

Hydrology and Earth System Sciences

Interactive Open Access Journal

Public Peer-Review | Interactive Public Discussion | Immediate Article Publication |

Free Online Access | Full Alert Service | Author Keeps Copyright

Executive Editors

Hubert H. G. Savenije, Jesús Carrera & Murugesu Sivapalan

Aims and Scope

Hydrology and Earth System Sciences (HESS) is an international two-stage open access journal for the publication of original research in hydrology, placed within a holistic Earth System Science context. The discussion and peer-review of submitted papers are handled in the open access discussion forum HESSD. Final papers, upon acceptance, appear in HESS. HESS encourages and supports fundamental and applied research that seeks to understand the interactions between water, earth, ecosystems and man. A multi-disciplinary approach is encouraged that enables a broadening of the hydrologic perspective and the advancement of hydrologic science through the integration with other cognate sciences, and the cross-fertilization across disciplinary boundaries.
